- HTML

## PROJECTS

### E-commerce mobile app /UI UX Design

The objective of this personal UI/UX design project was to create a seamless, user-friendly e commerce mobile application focused on enhancing the online shopping experience. The goal was to design intuitive user flows, visually appealing interfaces, and efficient checkout processes to reduce user friction, improve conversion rates, and deliver a delightful shopping journey. This project focused on solving real user pain points through user research, wireframing, prototyping, and usability testing
